

SWING CHAMBER SYSTEM RWS

All benefits at a glance

- ▶ Gentle and process-reliable, single-part oriented processing even of sensitive and/or complex work pieces
- ▶ Particularly suitable for integration into fully automated, interlinked production lines
- ▶ Minimized downtime
- ▶ High process consistency thanks to automatic monitoring systems (e.g., drives) and automatic blast media replenishment systems (e.g., blast media)
- ▶ Optimum, multi-stage blast media cleaning via blast chamber extraction, screening systems, and cascade air separator
- ▶ Project-specific design of the satellite units
